

Talbot/Billerica Falls Dam, built 1828, 5.8 to 8.28' high plus 7¾" flashboards. 1957 photo

Mr. Eric Hutchins, fisheries biologist, National Oceanic and Atmospheric Administration, will give an update on the return of alewives to the Concord River since the Dec 2016 Fish Restoration Feasibility Study Final Report.

The Middlesex Canal Association is opposed to the razing of the Billerica Falls Dam and consequent draining of the summit pond of the Middlesex Canal, an historic engineering landmark. Its opposition is expressed in Appendix I, "Comments", <<https://rb.gy/ikeqdf>>, of the 2016 Final Report. The Final Report is <rb.gy/3mbvqd>, download at View/Open.

The 61st annual meeting of the Association, a few minutes, will precede the update

Public Meeting

Sunday, May 15, 1 P.M.

Middlesex Canal Association, 71 Faulkner St, Billerica
