Project Description (narrative):

Remedial action at AOC 1, known as the Boston & Maine (B&M) Railroad Landfill, is required to protect environmental receptors from exposure to cadmium in soil and limit the migration of contaminants in the soil to groundwater. This will be accomplished by excavating landfill material from the edge of the wetland to minimize impacts of the cleanup action, capping landfill material, erecting a fence around the landfill, instituting land use restrictions, restoring wetlands impacted by the cleanup, inspecting and maintaining the landfill cap and fence, and sampling groundwater periodically to assess the effects of the source control action (capping).

Does the project include demolition? If so, specify nature of demolition and describe the building(s) which are proposed for demolition.
